

## **Volunteer of the Month: November 2016**

### **Richard Pascual**

Richard Pascual is a student at Miami Dade College North Campus and is the WBHI campus club's Vice President serving as a campus leader. Richard's career aspiration is to pursue a Doctorate degree in Clinical Psychology. Richard was invited by a friend to get more involved on campus and which enticed him to join Student Government and look for more ways to be involved in his community.

Richard wanted to make more of a difference, which prompted his desire to volunteer at WBHI outreach in the Spring 2016. He instantly found great joy in his service to the community and was committed to fighting against breast cancer and heart disease. He always feels motivated to come back again and again. By being involved in the WBHI outreach campaigns and being the Vice President of the WBHI Club MDC-NC, Richard is very proud of the change he is making in his community. Richard and the WBHI campus club are committed to promoting prevention and early detection to the next generation at MDC.

In his free time, he enjoys watching his favorite TV shows on Netflix or playing video games. Also, spends time skateboarding and playing acoustic guitar. We truly appreciate his commitment, positive attitude and his willingness to make a difference.

When asked about his first outreach experience he says "I was really excited because I get to serve the community and make a difference in people's lives. I was, of course, somewhat scared because, in a way, it was a new experience and it's an introvert person thing. Although I didn't get to make an appointment on my first outreach, it didn't discourage me from returning. Rather, it motivated me to come back and try again. I got my first appointment the very last Saturday of outreach. What I felt when I had my first appointment could not just simply be described by words. It was more than joy. It definitely made me jump."

Thank you Richard for your service!
